

**Melissa Jones**

Building strong partnerships to meet the needs of a clean energy future.

**Melissa Jones** is the General Manager of Agilus Inc., a Bechtel Company. Agilus' mission is to deliver decarbonization and emission reduction solutions predominantly for existing facilities. Agilus' customers are also executing progressive, small to mid cap greenfield advanced fuels, hydrogen and carbon capture projects. Melissa is ideally suited to this role as she brings a record of success on projects where collaboration with customers and partners is critical to achieving business objectives. Addressing the energy transition requires a high level of innovation, collaboration and speed.

Prior to her appointment in 2021, Melissa held the position of Global Manager of Business Development for the Downstream and Chemicals business line for three years. In this role, she worked alongside the D&C leadership to focus attention on the emerging energy transition market and provided support to key customers executing first of a kind energy transition projects. During her tenure, the D&C business line won awards with new customers in the US, UK, Saudi Arabia, Egypt and Kazakhstan. Notably, in 2019, Melissa led the establishment of a new office and entity in Al Khobar, Saudi Arabia.

Throughout her nearly 15 years with Bechtel and 20 years in the industry, Melissa has developed extensive experience in project development and execution spanning many sectors including refining, chemicals, power generation, infrastructure, and communications. Melissa was Chief Financial Officer for Bechtel's Power business from 2013-2015, during which time Bechtel completed three innovative solar facilities, including the [Ivanpah Solar Electric Generating System](#) in California. Melissa's role as Chief Financial Officer included financial and organizational planning for a significant restructuring of Bechtel's infrastructure and power businesses.

A diversity and social value champion, Melissa is currently the co-sponsor of the Bechtel Energy Women@Bechtel chapter and is the Bechtel management representative for the Society of Women Engineers.

Melissa began her career as part of an integrated project alliance at the Irving Oil Refinery, Canada's largest, in Saint John, New Brunswick. Melissa is an advisory board member for the Canada-Texas Chamber of Commerce and an active participant in programs encouraging use of Canadian clean energy innovations and technologies on global projects.
